Liquid Distribution Unit (LDU)

Avon Engineered Fabrications' Oasis Liquid Distribution Unit (LDU) is designed to provide an economical stationary storage solution for portable water. Avon Engineered Fabrications' Oasis Liquid Distribution Unit (LDU) is designed to provide an economical stationary storage solution for portable water. These tanks can hold up to 500 gallons and can limit the amount of water being wasted. It can be transported directly to communities to provide convenient access to multiple users. The distribution tank can be equipped with up to 8 spigots to allow efficient distribution to residents, thus shortening queuing time. The tank has both chemically and mechanically bonded fittings.

Accessories can be customized and adjusted per your requirements.

"When the well is dry, we know the worth of water"

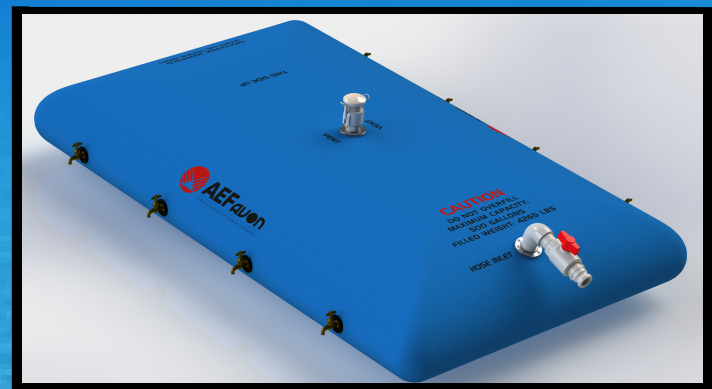

Benj. Franklin

Technical Information

- Storage capacity: 500 Gal
- Thermally welded seams
- Fabric
 - Urethane-coated nylon - high strength and heavy duty
 - Puncture and abrasion resistance
 - High UV Resistance (Desert Proven)
 - Innovative encapsulated edge technology
- Shelf life of 10 years
- Tank can be relocated during service life

Ideal For

- Emergency municipal water supply
- Disaster relief
- Temporary water storage
- Water distribution

**CUSTOM SIZES AND COLORS
AVAILABLE UPON REQUEST.**

Benefits

- Withstand temperature ranging from -25°F to 160°F
- Closed flexible system takes the shape of the liquid's volume and does not create ullage
- Potable water FDA compliant and can be NSF-61 certified upon request
- Designed to operate in various climate conditions
- Easily stored and transported, economical shipping
- Can be placed in areas with limited space
- Easy installation by unrolling and unfolding with limited personnel
- Custom manufacturing available upon request

Common Accessories

- Ground sheets
- Fittings

WHO WE ARE

Avon Engineered Fabrications LLC. is the world's foremost producer of high quality products made from industrial coated fabrics that meet the requirements of military and industrial consumers worldwide.

AEF's water tanks provide an alternative source of storing water for almost any needed situation by using flexible transport, static, embankment and open top CFTs

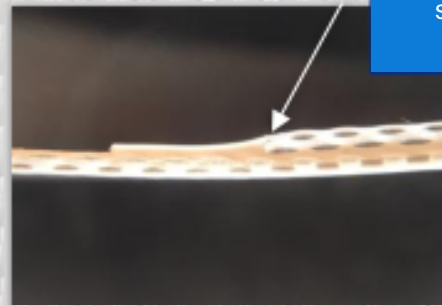

AEF AVON

A Performance Inflatables Company

Units being used by the Los Angeles Department of Water and Power (LADWP) to provide access to potable drinking water to its residents after a water main break.

AEF's pioneered joining technique eliminates leads paths and create a stronger and more durable seam
