

Avon Engineered Fabrications LLC. offers a variety of flexible secondary spill containments. Berm liner serves as an added protective device that retains spilled products in the event of a leak or catastrophic failure. Ground sheets are ideal for water tanks, serving as a protective layer from ground surfaces.

AEFs has both industrial standard sizes in military-grade polyurethane or PVC and can offer custom engineered solutions. Our light earthen berm liners are the best solution for both military and commercial applications

Types of Secondary Containment

- Berm liners
- Ground sheets
- Pool covers
- Pond liners

**CUSTOM SIZES AVAILABLE
UPON REQUEST.**

Secondary Containment

Benefits

- Fits easily under tanks, tents, and above ground pools
